

FREEDOM FRAUD PROTECTION

Extreme Network Protection

American Telephone Company's Freedom Fraud Protection is extreme network protection for an ever-changing world where voice and data operate on the same network and PBX's are IP-based, the threat of fraud is greater than ever.

ATC keeps your business voice and data networks secure in an unsecure world. ATC continues to adapt and innovate to ensure that our customers receive the utmost protection and support.

Freedom Fraud Protection Benefits at a Glance

Peace of Mind 24/7/365 Monitoring

Our administrators monitor your network and alert you immediately of any potential fraudulent activity.

Set Account Codes

Require specific passcodes to grant access to networks and other information.

Dialing Restrictions

Restrict certain users from dialing domestically and/ or internationally.

Call Restrictions

Allow or restrict calls by country code/ time of dayrouting.

Intelligent Response

Our system automatically determines if a customer is dialing more international or domestic than usual and shut down traffic if needed.

Set Your Limits
