

FREEDOM CONFERENCE PLAZA

ATC gives you the ability to access your company's virtual conference rooms in one location—via one phone number. With **Freedom Conference Plaza**, you can manage, customize and keep track of conference bridges like never before.

The screenshot shows the 'Manage Features' web portal. On the left is a navigation menu with options: Overview, Extensions, Trunks, Groups, IVRs, Conditions, Queues, and Features. The 'Features' section is expanded, showing sub-options: Manage Features, Internal Extensions, and Enterprise DIDs. The main content area is titled 'Manage Features' and includes a 'Conference Settings' section with a 'Custom Plaza Prompt' dropdown set to 'default' and an 'update' button. Below this is a table of conference rooms with columns for Edit, Room Name, PIN, Leader PIN, Extension, Music, Record, and DID. The table lists four rooms: Aaron Brown, Caroline Danvers, Edward Forest, and Geraldine Hoyt. A fifth room, Irene Johnson, is highlighted in orange and is in an edit state, showing input fields for PIN (1531), Leader PIN (5786), and Extension (1004). Below the table are several checkboxes for room settings: no enter/leave sounds, user count, announce users, record review (checked), and conf menu. An '+ add room' button is at the bottom left of the table area.

FEATURES

• Single Point of Entry

Dial one number to reach any of your virtual conference rooms. You no longer have to keep track of each dial-in number for each virtual conference room.

• Numbers Reach Your Plaza

Additional numbers reach the same conference plaza/facility – US domestic number is included, US toll-free can be added, as well as international numbers

• Make Changes Through Web Portal

Use the web portal to manage and make adjustments such as changing the conference label, room number, user PINs and leader PINs

• Custom Greetings

Play your own custom greeting when callers dial in (e.g. "Welcome to the Acme Consulting Conferencing Facility")

• Customization Per Conference Bridge

- Toggle call recording on and off – replay and download recorded calls through the web portal (additional charges may apply for storage)
- Toggle enter/leave sounds on and off – silences sounds when callers join/leave the conference room
- Toggle user count on and off – announces the number of users in the conference
- Toggle announcing users on and off – records the name of each caller and plays it when they join the conference
