

MPLS

Multi-Protocol Layer Switching (MPLS) Services consists of next generation switching technology that allows your company to deploy a multitude of voice and data applications over a safe and secure network. MPLS is a cost effective alternative to private line service and can even be used as a back up to an existing private line network. The ATC MPLS product line offers a complete range of options to provide your business with a truly customized solution.

Benefits

- ✓ Support the voice and data needs of remote offices
- ✓ Consolidate and manage applications company-wide
- ✓ Flexibility and Scalability to manage continuously changing applications
- ✓ Provide back-up for mission critical private line connections

Flexibility

- ✓ Network consolidation allows multiple networks that utilize different protocols and diverse applications to be consolidated on one wide area network (WAN) over a single access facility

Savings

- ✓ Fixed monthly cost
- ✓ Volume and term discounts available
